Words alone don't always reach the depth of a client's experience. **Intuitive Experiential Therapy** integrates **language, body awareness, intuition, and interactive techniques** to uncover deeper emotional truths and foster lasting healing.

This hands-on training introduces **practical tools** to help therapists **read non-verbal cues, engage the body's wisdom, and use intuitive guidance** to support client transformation. Through **experiential exercises and guided practice**, participants will gain new skills to **deepen connection, build trust, and unlock profound healing**.

Join us to explore a powerful approach that goes beyond words—into deeper connection and lasting change.

After the course you will be able to:

- Define Intuitive Experiential Therapy
- Understand the difference between Experiential Therapy and Intuitive Experiential Therapy
- Understand how guilt and shame inhibit the recovery process
- Identify body language messages that help the client get to core issues with trauma patterns
- Explore different techniques to help the client feel and release destructive emotional patterns
- Use validation patterns when the client is uncertain
- Identify potential ethical issues with Intuitive Experiential Therapy
